

FULL-SERVICE WEBCASTING SYSTEM AND FEATURES

Full-service webcasting includes a skilled technician who coordinates from start to finish all aspects of the Webcast. During event production, we bring everything needed for the webcast, only an on-site internet connection is required.

On-site production with the TW Mediacart™, our proprietary, portable production system, includes:

- Multiple Robotic HD cameras
- Lower screen graphics
- Picture in a picture
- Direct Power Point and media insertion
- Video switching with transitions
- HQ audio mixing
- Full HD Recording
- Minimal set-up and break-down time

Total Asset Manager, or TAM™, a proprietary, secure content management system, is deployed in the cloud as Software as a Service (SaaS), so you have nothing to buy or install. TAM™ features include:

- Custom viewing portal with style and color options along with customer branding
- Works on all operating systems - Win, Mac, IOS and Android
- Live Streaming and content hosting for on-demand viewing
- Registration and pay-per-view
- Viewer verification for continuing education
- Real-time Polling and Testing
- Viewer participation
- Document and Reference Management
- Optional Closed captions
- Optional Total Transcript Integration, with transcript and video interaction
- Synchronized Power Point Slide integration
- Agenda/Program Indexing for enhanced archive viewing
- Twitter feed embedding
- Virtual Control Panel for customer monitoring and communication
- Geographical statistics on live and archive viewing
